

Notebook Computer Locker

Description

Designed, constructed and electrically certified in New Zealand, to secure and charge laptops, data projectors, tablets, digital cameras and other valuable electronic items against unauthorised removal. Particularly suited to educational and corporate environments.

Features and Benefits

- 10 ventilated compartments with large enough volume for standard notebook or data projector in bags
- Constructed of strong 1.5mm steel (double the gauge of standard filing cabinets)
- Secured to floor and wall by a high strength, attack resistant, protected bracket system, affording ultimate security and Earthquake protection against personal injury and general damage
- Door corners are folded and welded to add strength and resistance to jemmying.
- Secure construction with no rivets or other external attack points.
- Option of high quality pick-resistant tubular locks for single user per compartment or wing handles with standard padlocks for multiple users per compartment.
- Keying options – keyed alike or keyed different with master key
- Aesthetically attractive design with quality finishing
- Overall dimensions 1920mm high x 470mm wide x 480mm deep.
- Individual compartment dimensions 360 mm wide x 158mm high x 418mm deep
